

PERMANENT WATERPROOF SHADE - GOLD COAST

This attractive, Flexshade® Quartet Q*5M is one of the largest in the Quartet range, and provides shade, UV protection and waterproofing to this outdoor setting. Located next to the pool, the centre column Quartet provides much needed cover for residents to relax and keep cool.

The Flexshade® Tedlar membrane is Translucent white, to reflect heat, and complements the waterside surroundings. It is durable and robust, allowing for 160km per hour wind loads. The frames are Triplex, hot zinc and powder coated to protect the steel from weather and exposure to salt water. This Flexshade® structure is manufactured to Tension Span's high standards, and carries a 10 year warranty.

Representative Amazing Shades has installed this Flexshade® structure on the Gold Coast.
