

CANTILEVER SHADE STRUCTURES - FLEXSHADE® Q*14'S'

This attractive Flexshade® Quartet Q*14'S' Cantilever Column structure provides quality shade for this outdoor eatery.

The membrane is premium Tedlar fabric which reflects the heat and all UV rays. The metal frames are Triplex coated to protect the steel from harsh weather conditions, and give a long trouble free life.

With technology derived from our large custom tension membrane structures, each Flexshade product is engineered to withstand 160km/hr winds. Our parent company Tension Span Structures ([link www.vesl-tensionspan.com](http://www.vesl-tensionspan.com)) incorporates over 30 years experience into the design and manufacture of every Flexshade® product.

Apart from the Quartet, other available styles are the Lotus, Hypar, Tetra, Auto and the recently designed Quad range. Sizes range from 2m to 15m.

The Flexshade® structure carries a 10 year structural warranty.

Our S.A. representative, Shadeform Sails installed this Flexshade® Quartet.
