

## See Naples and Flexshade®

Tension Span Structures Pty Ltd with USA Representative TSS-NA Inc., have completed another project in the United States, using the Flexshade® Lotus design.

The lotus flower shaped hexagonal form was chosen by architects for the Women's Clinic in Naples, Florida.

Over the entrance swoops a Lotus\*43 inverted conical with water feature, and the rear entertainment area has 3 Lotus\*20 modules linked together for continuous cover.

The Lotus structures are designed for 130mph (215 km/hr) hurricane winds.

<b>Client:</b>	Dr. Janice Young
<b>Project Manager:</b>	TSS-NA Inc.
<b>Design &amp; Construction By:</b>	Tension Span Structures Pty Ltd
<b>Project Status:</b>	Completed May 2006
